

## ABOUT US

Assistenza Sanitaria San Fedele has been caring for fragile people in Milano for more than 70 years. It is a voluntary association where doctors, pharmacists, psychologists, educators and volunteers inform and welcome.

The centre of its work is the free distribution of medicines to people who need them (mainly valid recovered medicines).

It takes care of the most fragile people by listening as much as possible to all their needs.

Whenever possible, it helps people to integrate into the city of Milan.

It works in close collaboration with the Local Health Authority and co-operates with the network of other non-profit organizations in the Milan area.

It hosts on its premises other associations such as the S.A.R.A. psychology desk and the Avvocati di Strada (Street Lawyers).
